

Giga T Pro II

NEW!

Wireless Timer Remote

The Giga T Pro II wireless remote control features a self-timer, interval timer, long exposure setting and exposure count settings for time-lapse, wildlife photography, astral and studio photography. It can also be used as a short cable shutter release to eliminate camera shake.

What's different?

Now available for Panasonic DSLRs

- ▶ Transmitter On/Off button - saves battery power
- ▶ Continuous shooting has been adjusted to mimic the rate of shutter speed on the camera
- ▶ Repeat mode for Interval Shooting.
Giga T Pro II has two timing loops, one embedded in the other. This feature allows you to repeat the original timed programme as many times as required.
- ▶ For example: Use the original programme feature to create a timed 10 minute series of astral shots. You can then set this programme to repeat at hourly intervals.
- ▶ See www.youtube.com and search for "giga t pro" for other examples.

Interchangeable connectors for different camera models

Photo taken with Giga T Pro Remote Control 36 minute exposure overlooking Lake Wakatipu in New Zealand's South Island.

Use the Giga T Pro II to capture your own series of nightscapes, by setting a repeat of the original timed programme.

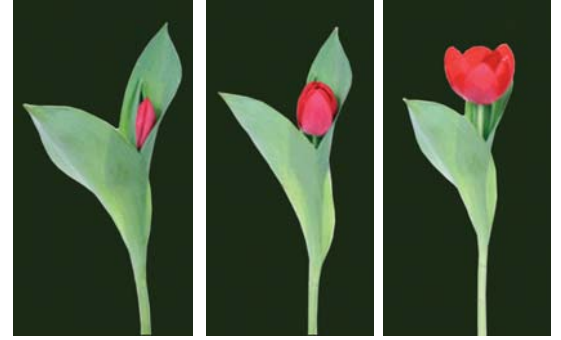

Wireless control with more than 100m range

- ▶ Perfect for for time-lapse photography cloudscapes, landscapes, wildlife shots.
- ▶ Through wall transmission
- ▶ High-tech, reliable wireless FSK 2.4GHz frequency, licence free transmission worldwide.
- ▶ LCD display with back lighting
- ▶ Channel selector for individual control of multiple cameras
- ▶ Receiver takes a CR2 Lithium Battery
Transmitter takes CR2032 Battery

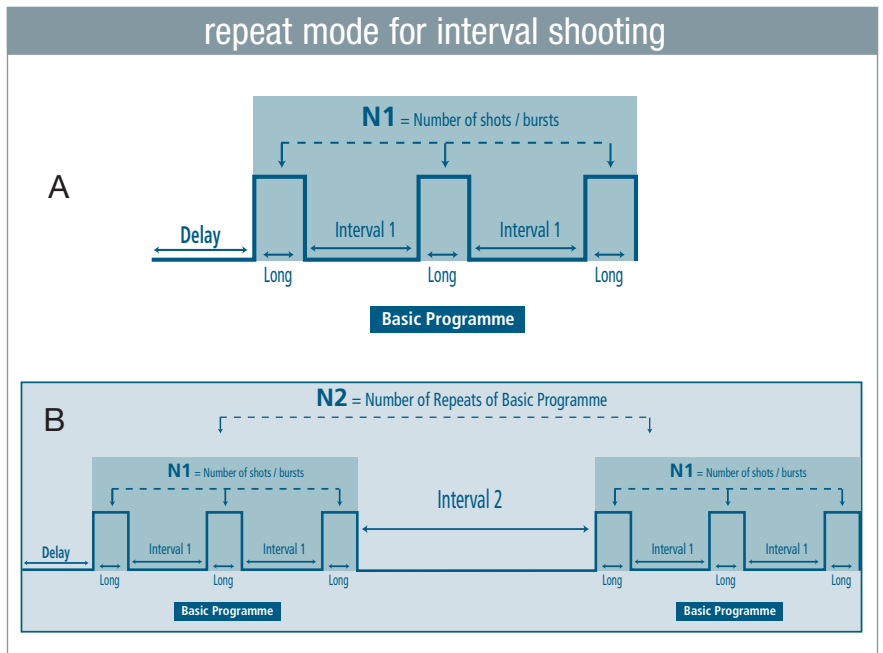

Repeat Mode for Interval Shooting

- ▶ The two graphics below help to illustrate the timed sequences.
- ▶ The basic programme (A) below allows you to set up a timed shooting sequence, defining the delay, the number shots, the interval shots and so on.
- ▶ For example you may wish to take 5 shots, 1 minute apart, and delay this sequence by an hour.
- ▶ The 'repeat mode for interval shooting' (B) allows you to repeat the above sequence (A) every 4 hours for up to 99 repeats.

Available for Canon, Nikon, Olympus, Sony & Panasonic
